

Test Verification: tests/integration/test_learning_system.py line 144-173 shows this IS tested:

Part 2: The Integration Gap - HTTP API Flow

Flow Diagram: What SHOULD Happen vs. What DOES Happen

Evidence: IntentService Does NOT Call Learning

services/intent/intent_service.py - Complete Intent Processing Path (lines 94-275):

The service:

1.  Classifies intent (line 139-142)
 2.  Routes CONVERSATION ! _handle_conversation_intent() (line 199-200)
 3.  Routes TEMPORAL/IDENTITY/etc. ! canonical_handlers.handle() (lines 203-210)
 4.  Routes QUERY ! orchestration_engine.handle_query_intent() (line 231)
 5.  NOWHERE
-

System A: OrchestrationEngine Learning (ACTIVE)

Part 7: Why Tests Passed But API Failed (Test Coverage Blind Spot)

The Root Cause: Test Fixtures Don't Exercise HTTP Flow

tests/intent/conftest.py

- What should CONVERSATION patterns look like?
- What should TEMPORAL preference patterns look like?
- How do we store “user prefers morning meetings”?

3. Define preference application:
